How did you know about the Bigger Game Workshop?

Through a Webinar organized by ICF in which I participated to get to know the theory of the Bigger Game and to work out if it would be a good tool to also implement with our customers.

One sentence about your personal interest in attending this workshop?

On the one hand I would like to know more about the tool in the workshop setting to get a better understanding of how it works with groups in order to maybe add it to our "toolbox", but on the other hand to maybe figure out where I stand right now in realm of further education or certification possibilities.
